DEPARTMENT OF VITAL STATISTICS.

OFFICE OF THE REGISTRAR,
AUGUSTA, MAINE, April 16, 1907.

To His Excellency, William T. Cobb, Governor, and the Honorable Executive Council:

GENTLEMEN:—In accordance with the provisions of the law, I have the honor of submitting to you the Fourteenth Annual Report relating to the births, marriages, divorces, and deaths which were registered in Maine in the year 1905.

Very respectfully,

A. G. YOUNG, M. D.,
Registrar of Vital Statistics.

REGISTRATION REPORT, 1905.

This report presents the results of the registration and tabulation of the births, marriages, divorces, and deaths which occurred in the State of Maine during the year 1905.

The number of births registered in that year is 600 more than in the preceding year. The number of births recorded in each of the registration years, 1892-1905, is 14,028, 14,604, 14,607, 15,430, 15,429, 15,142, 15,121, 14,475, 14,709, 14,615, 15,166, 15,130, 15,405, and 16,005, respectively.

The number of marriages (number of couples married) in 1905 was 6,264 more than in the preceding year. The number of marriages registered in the State in each of the years 1892-1905 is respectively, 5,726, 5,795, 5,591, 5,729, 5,579, 5,331, 5,144, 5,329, 5,482, 5,735, 5,905, 6,200, 6,208, and 6,264.

The number of deaths recorded in the State for the same year was 11,381, a number 35 more than that of the deaths registered in the preceding year. The number of deaths in each year thus far recorded is: in 1892, 12,147; in 1893, 11,134; in 1894, 11,012; in 1895, 10,464; in 1896, 10,626; in 1897, 11,236; in 1898, 10,956; in 1899, 11,370; in 1900, 11,389; in 1901, 11,133; in 1902, 10,673; in 1903, 11,009; in 1904, 11,346, and in 1905, 11,381.

Compared with 1904, among the chief causes of death there were in 1905, 197 more from diarrheal diseases, 77 more from influenza, 71 more from diseases of the nervous system, 51 more from cancer, 31 more from diseases of heart, 27 more from peritonitis, 24 more from diabetes, 17 more from nephritis and Bright's disease, 10 more from measles, and 3 more from pneumonia.

On the other hand there was a smaller number of deaths from the following causes: from tuberculosis in all forms 108 fewer; from typhoid fever, 86; from diphtheria and croup, 52; from whooping cough, 16; from bronchitis, 5; and from scarlet fever, 3.

Bertillon Classification. The nomenclature of the causes of death in this report is the revised Bertillon classification adopted by the International Commission which met in Paris in August, 1900.

Table No. 1 gives a cursory view of the relative mortality in 1904 and 1905 from some of the leading causes of death.

TABLE No. 1.

Deaths from Some of the Leading Causes.

Diseases.	1904.	1905.	More in 1904.	More in 1905.
Measles	22	32	-	10
Scarlet fever	10	7	3	-
Influenza	166	243	-	77
Whooping cough	54	38	16	-
Diphtheria and croup	162	110	52	-
Typhoid fever	242	156	86	-
Tuberculosis	1,217	1,109	108	-
Diarrheal diseases	475	672	-	197
Rheumatism	60	60	-	-
Cancer	611	662	-	51
Diabetes	91	115	-	24
Diseases of nervous system	1,576	1,647	-	71
Diseases of heart	1,191	1,222	-	31
Pneumonia	1,050	1,053	-	3
Bronchitis	223	218	5	-
Peritonitis	63	90	-	27
Nephritis and Bright's disease	629	646	-	17

Population. The population of the State of Maine in 1900, as given by the twelfth census, was 694,466. In 1890, the population of the State was 661,086. There was therefore, a gain of 33,380 in the decade between the last two census enumerations. The following table exhibits the population of the several counties in 1890 and in 1900, and the estimated population in 1905.

TABLE No. 2.

Population in 1890, and 1900, and Estimated Population for 1905.

Counties.	Population in 1890.	Population in 1900.	Estimated population for 1905.

TABLE No. 3.

Births, Marriages and Deaths, 1897-1905.

State.	1897.	1898.	1899.	1900.	1901.	1902.	1903.	1904.	1905.
Number of births	14,430	14,473	13,895	14,095	14,021	14,508	14,453	14,673	15,294
Number of marriages	5,331	5,144	5,329	5,482	5,735	5,905	6,200	6,208	6,264
Number of deaths	11,236	10,956	11,370	11,389	11,133	10,673	11,009	11,346	11,381
Birth-rate	21.83	21.89	20.10	20.30	20.19	20.89	20.81	21.13	21.40
Marriage-rate	8.07	7.78	7.71	7.89	8.26	8.50	8.93	8.94	8.76
Death-rate	16.99	16.57	16.45	16.40	16 03	15.37	15.85	16.34	15.92

Birth, Marriage, and Death-Rates. In this report the birth-rates, marriage-rates, and death-rates from all causes are stated as so many among each 1,000 of the population according to the estimated population for 1905, excepting Tables No. 7 and 8.

Death-rates from individual causes, or from groups of diseases are expressed as per 10,000.

TABLE No. 4.

Estimated Population for 1905, Births, Marriages and Deaths with rate of each to 1,000 of Population for the Year ending December 31, 1905.

Counties.	Estimated population for 1905.	Births.	Birth-rate per 1,000.	Marriages.	Marriage-rate per 1,000.	Deaths.	Death-rate per 1,000.

State	714,678	15,294	21.40	6,264	8.76	11,381	15.92

The following is a general summary of the births, marriages, and deaths in 1905.

BIRTHS.

Sex.		Parentage.	
Males	7,794	American	9,189
Females	7,483	Foreign	3,179
Not stated	17	One parent foreign	2,751
	15,294	Not stated	175
			15,294

Whole number of births	15,294
Birth-rate per 1,000	21.40

MARRIAGES.

Groom and bride both American	4,479
Groom and bride both foreign	672
Groom American, bride foreign	514
Groom foreign, bride American	560
Not stated	39
Whole number of marriages	6,264
Marriage-rate per 1,000	8.76

DEATHS.

Sex.		Parentage.	
Males	5,835	American	9,670
Females	5,545	Foreign	1,538
Not stated	1	Not stated	173
	11,381		11,381

Whole number of deaths	11,381
Death-rate per 1,000	15.92

Relation of Births to Deaths.—As the total number of births registered in Maine in the year 1905 was 16,005, and the number of deaths was 11,381, the natural increase of births over deaths was 4,624.

The following table shows the number of births and deaths in each county, and the preponderance of births over deaths, or vice versa:

TABLE No. 5.

Counties.	Estimated population for 1905.	Births.	Deaths.	Difference.
Androscoggin	56,879	1,164	900	264 gain
Aroostook	66,322	2,241	802	1,439 gain
Cumberland	105,559	2,066	1,788	278 gain
Franklin	19,140	432	283	149 gain
Hancock	37,241	733	544	189 gain
Kennebec	60,170	1,177	1,115	62 gain
Knox	30,406	465	478	13 loss
Lincoln	19,669	345	269	76 gain
Oxford	33,064	792	506	286 gain
Penobscot	77,937	1,578	1,305	273 gain
Piscataquis	17,357	353	270	83 gain
Sagadahoc	20,769	344	322	22 gain
Somerset	34,460	698	561	137 gain
Waldo	24,185	352	407	55 loss
Washington	45,607	1,013	673	340 gain
York	65,913	1,541	1,158	383 gain
State	714,678	15,294	11,381	3,913 gain

In the cities the relation of the number of births to that of the deaths is conveniently shown in the following table, together with the birth-rate and the death-rate per 1,000 of the estimated population in each city. [The discrepancy in the death-rates in the cities which may be noted in comparing this table with Table No. 7 is due to the fact that in this table the death-rates are based upon estimated populations, while in Table No. 7 the death-rates are per 1,000 of population as shown by the census of 1900.]

TABLE No. 6.

Cities.	Population in 1900.	Estimated population in 1905.	Births.	Deaths.	Difference.	Birth-rate.	Death-rate.
Auburn	12,951	13,802	208	173	35 gain	15.07	12.53

NOTES ON BIRTHS.

In the year 1905, 16,005 births were registered in the State, including still-births (14,082 in 1892, 14,604 in 1893, 14,607 in 1894, 15,430 in 1895, 15,429 in 1896, 15,142 in 1897, 15,121 in 1898, 14,475 in 1899, 14,709 in 1900, 14,615 in 1901, 15,166 in 1902, 15,130 in 1903, and 15,405 in 1904).

The number of living children born was 15,294, and the number of still-births was 711.

Of the whole number of living children of which the sex was certified 7,794 were males and 7,483 were females. In 17 births the sex was not stated. For each 100 girls born there were 104.1 boys (106.7 in 1892, 107.4 in 1893, 104.7 in 1894, 106.4 in 1895, 105.3 in 1896, 102.3 in 1897, 106.0 in 1898, 104.4 in 1899, 103.2 in 1900, 105.6 in 1901, 105.0 in 1902, 105.3 in 1903, and 104.2 in 1904).

Birth-rate. The birth-rate of living children for the State was 21.40 for each 1,000 of population.

Table No. 13 shows the number of births in each city with the birth-rate of each. The average birth-rate in the cities per 1,000 population was 20.58 as compared with 21.82, the birth-rate of the rest of the State.

The birth-rate of the different counties varied widely. As it invariably has been every year since the registration began, it was the highest in Aroostook, 34.60, and the lowest in Waldo, 14.52. In five counties, Aroostook, Franklin, Oxford, Washington, and York, the birth-rate was above that of the whole State. The birth-rate in each county is shown in Tables No. 4 and 8.

Parentage.—Of the total births in the State, 60.08 per cent. were of native parents; 20.79 per cent. were of foreign parentage; 17.99 per cent. were of parents one of whom was foreign; while of 1.14 per cent. the nationality was not stated.

Lincoln county had the largest percentage of native-born parents, to wit, 91.01 per cent., and only 0.58 per cent. in which both parents were foreign-born. Waldo followed with 89.49

per cent. of native parentage, and only 2.56 per cent. in which both parents were foreign-born.

In Hancock county in 87.04 per cent. of the births the parents were native-born and in 3.68 per cent. foreign-born.

In Knox, the percentage of native-born parents was 76.99; in Somerset, 73.92; in Piscataquis, 71.10, and in Franklin, 69.91.

Comparatively high percentages of foreign-born parents are found in Androscoggin county, 39.60; in York, 37.90; in Cumberland, 28.22; in Kennebec, 22.85; in Oxford, 22.10; and in Penobscot, 20.92 per cent.

The percentages of parentage, whether American-born or foreign-born, may be found for the other counties in Table No. 14.

Comparing the percentage of the births in our twenty cities with that of the rest of the State, we find that, in the cities, 41.36 per cent. of the births were of American parentage, while in the rural parts of the State, the percentage of American-born children was 69.01.

The largest percentage of foreign-born parents was in Biddeford, 68.36; and in Lewiston, 52.50.

In Ellsworth there were no foreign births, and in Belfast only 1.89 per cent. of the births had both parents foreign-born. For further comparison see Table No. 15.

Seasons and Births.—The largest number of births in any one month in 1905 was 1,463 in March; the smallest was 1,057 in November; the largest quarterly total was 4,080 in the second quarter; the smallest, 3,363 in the last quarter. The three consecutive months in which the largest number of births occurred were May, June, and July, 4,179.

The following is a tabular statement of the number of births in each month of the fourteen years 1892-1905:

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Not stated.	Total.
1892	1,016	1,113	1,345	1,275	1,323	1,176	1,222	1,191	1,144	1,047	1,002	1,121	63	14,028

1905	1,178	1,180	1,463	1,340	1,365	1,375	1,439	1,328	1,259	1,163	1,057	1,143	4	15,294

Twin-births.—In 1905, 168 twin-births occurred; in 60 instances the twins were both boys; in 54, both girls; in 54, a boy and a girl. In 100 cases the parentage was American; in 42, foreign; in 24 instances the parentage was mixed; and in 2 it was not stated. Of the 336 children, 309 were born alive, and 27 were still-born.

Triplets.—In Monticello a triple birth occurred, in which all the children were living. There were also triplets in Bath and York; in each of these only one was living.

Still-births.—Of the 711 still-born children, 398 were males and 294 were females. In 19 the sex was not stated. With the exception of nine still-births, as to which the nativity of the mother was not stated, 504 were of American mothers, and 198 were of foreign mothers.

The largest number of still-births occurred in Cumberland and Aroostook counties, 105 in each; while the minimum number, 9, was reported in Lincoln county.

The largest number of still-births, 77, was returned in October; the smallest number was 50 in July. See Tables No. 18 and 19 for other details.

NOTES ON MARRIAGES.

The number of marriages registered in the State during the year 1905 was 6,264 (5,726 in 1892, 5,795 in 1893, 5,594 in 1894, 5,729 in 1895, 5,579 in 1896, 5,331 in 1897, 5,144 in 1898, 5,329 in 1899, 5,482 in 1900, 5,735 in 1901, 5,905 in 1902, 6,200 in 1903, and 6,208 in 1904). We have, therefore, for the year 1905, a marriage-rate of 17.52 (persons married) to every 1,000 of population, or at the rate of 8.76 marriages per 1,000 persons.

Marriage-rates.—The marriage-rate was higher in Oxford county than elsewhere in the State, it being for that county 10.94 per 1,000. The lowest marriage-rate, that of 5.91 per 1,000 was in Lincoln county. See Table No. 4.

Nativity.—Of the 6,225 records of marriage in which there was a statement of birthplace, in 72 per cent. the groom and bride were both American; in 11 per cent. both were of foreign birth; in 8 per cent. the groom was American and the bride of foreign birth; while in 9 per cent. a foreign groom and American bride were united.

Seasons.—The largest number of marriages, 796, was solemnized in June, while the smallest number in any one month, 325, occurred in February. See Table No. 22.

Ages of the Married.—The largest number, both of grooms and brides, was between 20 and 25 years of age. While still under 15 years of age, 8 brides were married; in the age-period 15-20 years there were 252 grooms and 1,758 brides; in the period 20-25 years 2,281 men and 2,269 women were married; from 25-30, 1,733 men and 1,064 women; from 30-35, 804 men and 445 women; from 35-40, 416 men and 265 women; from 40-45, 229 men and 160 women; from 45-50, 183 men and 113 women; from 50-55, 131 men and 61 women; from 55-60, 93 men and 62 women; from 60-70, 103 men and 45 women; from 70-80, 35 men and 5 women; over 80, one man and one woman.

The age of 3 grooms and 8 brides was not stated. See Table No. 24.

In 5,319 marriages, the groom was older than the bride; while in 945, the bride was the elder; 773 widowers and 599 widows were remarried; 287 men and 356 women were remarried after having been divorced from a former marriage.

Table No. 25 exhibits the fact that 5,192 men and 5,291 women were married for the first time; that 950 men and 860 women were married the second time; that 101 men and 87 women were united in the third marriage; that 6 men and 7 women contracted marriage a fourth time; and 3 men and 1 woman were married a fifth time. The oldest groom was 80 years of age, and the oldest bride was 81. The youngest groom was 16 years of age, and the youngest bride was 13.

At the age of 16 years, 3 grooms were married; at 17 years, 13; at 18 years, 65; and at 19 years, 170. At the age of 13 years, 1 bride was married; at 14 years, 7; at 15, 74; at 16, 175, at 17, 324; and at 18, 598.

One man was married for the first time at the age of 69 years, one at 65, one at 62, and one at 61. Four brides were married a second time at the age of 17 years, one at the age of 16, and one at 18. In one instance the bride was married a fourth time when 29 years of age, while in another case the bride was married a fifth time when but 25 years old. One woman contracted marriage for the first time at the age of 81 years, while the groom was but 21.

NOTES ON DIVORCES.

Eight hundred and forty-eight divorces were decreed in the year 1905 (552 in 1892, 627 in 1893, 674 in 1894, 681 in 1895, 668 in 1896, 722 in 1897, 764 in 1898, 790 in 1899, 801 in 1900, 808 in 1901, 905 in 1902, 946 in 1903, and 906 in 1904). In 1905, there was decreed in Maine one divorce for every 7.4 marriages solemnized.

Some of the causes for which divorces were granted are: Adultery, 94, or 11.1 per cent. of the whole number; cruelty, 32, or 3.8 per cent.; desertion, 224, or 26.4 per cent.; intoxication, 109, or 12.9 per cent.; cruel and abusive treatment, 300, or 35.4 per cent.; failure to support, 27, or 3.2 per cent. The other divorces were granted for multiple or associated causes.

The wife was the libellant in 610 divorces, and the husband in 238.

In the divorces granted for adultery, the husband was the libellant 61 times, and the wife 33 times.

On account of cruelty, the wife was the libellant in 23 cases, and the husband in 9 cases.

For desertion, the husband was the libellant 92 times, and the wife 132.

For intoxication, the husband was the libellant in 2 cases, and the wife in 107.

For cruel and abusive treatment, the husband was the libellant in 68 instances, and the wife in 232.

For failure to support, the wife was the libellant in the 27 divorces decreed for that cause.

Four divorces were granted before the marriage life had lasted six months; 8 before 1 year's marriage; 242 after from 1 to 5 years' marriage; 237 after 5 to 10 years; 240 after 10 to 20 years; 94 after 20 to 30 years; 21 after more than 30 years of married life; while in 2 cases it was not stated how many years they had been married. Tables No. 26 and No. 27 may be consulted for more detailed statements.

Diseases of the bladder	42	2	3	7	4	3	5	2	6	4	–	3	3	–
Diseases of the urethra, urinary abscess, etc	1	–	–	1	–	–	–	–	–	–	–	–	–	–

TABLE No. 31—Concluded.

Deaths from All Causes by Months—1905.

CAUSES OF DEATH.	Total.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Not stated.
Diseases of the prostate	25	1	2	1	4	2	1	3	6	–	1	2	2	–
Nonvenereal diseases of the male genital organs	1	–	–	–	1	–	–	–	–	–	–	–	–	–
Uterine hemorrhage (non-puerperal)	6	–	1	1	–	1	1	–	1	–	–	1	–	–
Uterine tumor (non-cancerous)	5	–	–	2	1	–	–	1	–	–	–	1	–	–
Other diseases of the uterus	7	–	1	–	1	–	2	–	1	1	–	1	–	–
Cysts and other tumors of the ovary	6	–	2	–	–	–	–	1	2	–	–	1	–	–
Other diseases of the female genital organs	7	–	–	–	2	1	–	–	1	1	1	–	1	–
VII.—The puerperal state	83	9	5	9	6	7	7	8	5	4	5	8	10	–
Accidents of pregnancy	15	1	2	3	1	–	–	3	1	–	1	–	3	–
Puerperal hemorrhage	6	1	1	–	–	–	1	–	1	–	–	–	2	–
Other accidents of labor	3	–	1	1	–	–	–	–	–	–	–	1	–	–
Puerperal septicemia	32	6	–	1	3	4	4	2	–	3	1	4	4	–
Puerperal albuminuria and eclampsia	10	–	–	2	1	1	1	1	2	–	–	2	–	–
Other puerperal accidents, sudden death	17	1	1	2	1	2	1	2	1	1	3	1	1	–
VIII.—Diseases of the skin and cellular tissue	85	12	6	6	10	6	4	8	7	7	6	7	6	–
Gangrene	70	9	5	5	9	6	3	6	6	6	6	6	3	–
Furuncle, boil, carbuncle	4	–	–	1	–	–	–	–	1	–	–	1	1	–
Phlegmon, acute abscess	6	2	–	–	1	–	1	1	–	–	–	–	1	–
Other diseases of the skin and its adnexa	5	1	1	–	–	–	–	1	–	1	–	–	1	–
IX.—Diseases of the organs of locomotion	12	–	3	1	1	2	–	1	1	–	1	1	1	–
Non-tuberculous diseases of the bones	11	–	3	1	–	2	–	1	1	–	1	1	1	–
Arthritis and other diseases of the joints (tuberculosis and rheumatism excepted)	1	–	–	–	1	–	–	–	–	–	–	–	–	–
X.—Malformations.														
Malformations, congenital (stillbirths excepted)	75	8	3	5	9	6	6	7	6	7	8	3	7	–
XI.—Early infancy	489	33	36	47	38	58	37	41	45	52	36	34	31	1
Congenital icterus, debility, and sclerema	398	29	33	38	27	47	33	36	34	37	27	30	26	1
Other diseases of early infancy	29	1	1	1	4	5	1	3	2	3	1	–	2	–
Lack of care	62	3	2	3	7	6	3	2	9	12	8	4	3	–
XII.—Old age.														
Senile debility	724	78	71	85	68	63	60	44	53	50	64	40	48	–
XIII.—Deaths from external causes	518	30	33	44	38	49	49	51	61	47	47	36	30	3
Suicide by poison	11	1	1	3	1	2	–	–	1	1	–	–	1	–
Suicide by asphyxia	1	–	–	–	–	–	–	–	–	–	–	–	1	–
Suicide by hanging or strangulation	23	–	1	3	–	4	1	2	2	6	1	2	1	–
Suicide by drowning	13	–	–	–	2	2	1	–	1	3	3	1	–	–
Suicide by firearms	25	2	–	3	6	–	5	3	2	1	1	2	–	–
Suicide by cutting instruments	9	–	2	–	1	–	1	1	–	1	1	–	2	–
Other suicides	2	–	–	1	–	–	–	–	–	–	1	–	–	–
Fractures	68	5	5	6	2	9	4	6	8	11	6	1	4	1
Other accidental injuries	142	8	11	16	4	11	14	11	16	10	19	12	9	1
Burns and scalds	39	2	2	3	2	4	3	6	3	2	3	7	2	–
Sunstroke	1	–	–	–	–	–	–	1	–	–	–	–	–	–
Freezing	4	3	1	–	–	–	–	–	–	–	–	–	–	–
Accidental drowning	87	–	–	2	8	15	15	16	14	6	3	3	4	1
Inanition (starvation)	2	–	–	–	–	–	–	1	1	–	–	–	–	–
Absorption of deleterious gases, (non-suicidal)	17	3	5	–	–	–	–	–	4	1	1	1	2	–
Other acute poisonings	24	3	2	2	1	–	–	2	3	3	2	4	2	–
Other external violence	50	3	3	5	11	2	5	2	6	2	6	3	2	–
XIV.—Deaths from ill-defined causes	379	31	36	33	37	19	22	27	31	48	35	31	28	1
Dropsy	23	2	2	2	2	1	–	1	3	3	2	2	3	–
Sudden death	20	1	–	3	3	–	2	–	1	4	3	–	3	–
Unspecified or ill-defined causes of death	336	28	34	28	32	18	20	26	27	41	30	29	22	1

TABLE

Deaths from all Causes by

Causes of Death.	Sex.	Totals.	0.	1.	2.	3	4.	0-4.
Hydatid tumors of the liver	Totals	1	-	-	-	-	-	-
	Males	1	-	-	-	-	-	-
	Females	-	-	-	-	-	-	-
Cirrhosis of the liver	Totals	242	2	-	-	-	-	2
	Males	153	1	-	-	-	-	1
	Females	89	1	-	-	-	-	1
Biliary calculi	Totals	72	-	-	-	-	-	-
	Males	23	-	-	-	-	-	-
	Females	49	-	-	-	-	-	-
Other affections of the liver	Totals	336	19	3	-	-	-	22
	Males	190	13	1	-	-	-	14
	Females	146	6	2	-	-	-	8
Affections of the spleen	Totals	13	-	-	-	-	-	-
	Males	10	-	-	-	-	-	-
	Females	3	-	-	-	-	-	-
Inflammatory peritonitis (puerperal excepted)	Totals	388	27	8	5	4	4	48
	Males	164	15	4	3	3	1	26
	Females	224	12	4	2	1	3	22
Other affections of the digestive system (cancer and tuberculosis excepted)	Totals	3	-	-	-	-	-	-
	Males	-	-	-	-	-	-	-
	Females	3	-	-	-	-	-	-
Appendicitis and abscess of the iliac fossa	Totals	329	2	2	5	2	5	16
	Males	192	-	2	3	1	4	10
	Females	137	2	-	2	1	1	6
Acute nephritis	Totals	272	11	6	5	2	1	25
	Males	141	4	5	5	1	1	16
	Females	131	7	1	-	1	-	9
Bright's disease	Totals	2,741	15	2	1	5	5	28
	Males	1,597	7	1	-	1	3	12
	Females	1,144	8	1	1	4	2	16
Other diseases of the kidneys and their adnexa	Totals	117	6	2	-	-	-	8
	Males	76	5	1	-	-	-	6
	Females	41	1	1	-	-	-	2
Calculi of the urinary tract	Totals	10	-	-	-	-	-	-
	Males	6	-	-	-	-	-	-
	Females	4	-	-	-	-	-	-
Diseases of the bladder	Totals	256	6	-	-	-	-	6
	Males	230	5	-	-	-	-	5
	Females	26	1	-	-	-	-	1
Diseases of the urethra, urinary abscess etc.	Totals	9	-	-	-	-	-	-
	Males	6	-	-	-	-	-	-
	Females	3	-	-	-	-	-	-
Disease of the prostate	Totals	102	-	-	-	-	-	-
	Males	102	-	-	-	-	-	-
	Females	-	-	-	-	-	-	-
Non-venereal diseases of the male genital organs	Totals	5	-	-	-	-	-	-
	Males	5	-	-	-	-	-	-
	Females	-	-	-	-	-	-	-
Uterine hemorrhage (non-puerperal)	Totals	16	-	-	-	-	-	-
	Males	-	-	-	-	-	-	-
	Females	16	-	-	-	-	-	-
Uterine tumor (non-cancerous)	Totals	27	-	-	-	-	-	-
	Males	-	-	-	-	-	-	-
	Females	27	-	-	-	-	-	-
Other diseases of the uterus	Totals	57	-	-	-	-	-	-
	Males	-	-	-	-	-	-	-
	Females	57	-	-	-	-	-	-
Cysts and other tumors of ovary	Totals	53	-	-	-	-	-	-
	Males	-	-	-	-	-	-	-
	Females	53	-	-	-	-	-	-
Other diseases of female genital organs	Totals	36	-	-	-	-	-	-
	Males	-	-	-	-	-	-	-
	Females	36	-	-	-	-	-	-

NOTES ON DEATHS AND THE CAUSES OF DEATH.

Death-rates.—The number of deaths registered in the year 1905 was 11,381 (12,147 in 1892, 11,134 in 1893, 11,012 in 1894, 10,464 in 1895, 10,626 in 1896, 11,236 in 1897, 10,956 in 1898, 11,370 in 1899, 11,389 in 1900, 11,133 in 1901, 10,673 in 1902, 11,009 in 1903, and 11,346 in 1904). The number of deaths for this registration year was, therefore, 35 more than for 1904, 372 more than for 1903, 708 more than for 1902, 248 more than for 1901, 8 less than for the year 1900, 11 more than for 1899, 425 more than for 1898, 145 more than for 1897, 755 more than for 1896, 917 more than for 1895, 369 more than for 1894, 247 more than for 1893, and 766 less than for 1892. The death-rate for the State for the year 1905 was 15.92 for every 1,000 of population (18.37 in 1892, 16.84 in 1893, 16.66 in 1894, 15.83 in 1895, 16.07 in 1896, 16.99 in 1897, 16.57 in 1898, 16.45 in 1899, 16.40 in 1900, 16.03 in 1901, 15.37 in 1902, 15.85 in 1903, and 16.34 in 1904).

By referring to Table No. 4, it will be seen that the death-rate of Aroostook county was lower than that of any other county, being only 12.38. The counties Androscoggin, Aroostook, Franklin, Hancock, Knox, Lincoln, Oxford, Piscataquis, Sagadahoc and Washington had lower death-rates than that of the whole State; while the counties Cumberland, Kennebec, Penobscot, Somerset, Waldo and York had death-rates larger than that of the State. The highest county death-rate was that of Kennebec, 18.13.

The death-rate in the cities was 16.79 (20.46 in 1892, 19.89 in 1893, 19.65 in 1894, 18.36 in 1895, 18.78 in 1896, 20.11 in 1897, 19.74 in 1898, 18.10 in 1899, 18.34 in 1900, 17.90 in 1901, 17.03 in 1902, 17.16 in 1903, and 18.00 in 1904), as compared with that of the rest of the State with the cities omitted, which death-rate was 15.49 (17.46 in 1892, 15.54 in 1893, 15.39 in 1894, 14.77 in 1895, 14.93 in 1896, 15.68 in 1897, 15.24 in 1898, 15.52 in 1899, 15.47 in 1900, 15.13 in 1901, 14.58 in 1902, 13.39 in 1903, and 15.54 in 1904).

Seasons and Mortality.—The largest number of deaths occurred in March, 1,197. The smallest number of deaths in any one month was 768 in July. During the spring months 3,177 deaths occurred; during the summer, 2,604; during the

autumn, 2,794; in the winter, 2,789. The following shows the month in which the largest and the smallest number of deaths occurred in the years 1892-1905:

	Largest Number.		Smallest Number.	
1892	January	1,577	November	790
1893	August	1,080	November	796
1894	January	1,266	November	761
1895	March	1,053	June	715
1896	August	1,079	November	667
1897	March	1,259	June	769
1898	September	1,147	June	791
1899	February	1,049	June	768
1900	April	1,196	November	769
1901	March	1,132	June	789
1902	December	998	June	805
1903	January	1,006	June	786
1904	April	1,116	July	800
1905	March	1,197	July	768

The following is a tabular statement of the number of deaths in each quarter of the fourteen years 1892-1905:

	1st Quarter.	2d Quarter.	3d Quarter.	4th Quarter.
1892	3,964	2,926	2,780	2,427
1893	2,653	2,825	2,878	2,750
1894	3,166	2,660	2,774	2,402
1895	2,780	2,412	2,764	2,503
1896	2,728	2,717	2,836	2,339
1897	3,026	2,681	2,856	2,671
1898	2,567	2,641	2,964	2,782
1899	3,416	2,632	2,767	2,544
1900	2,879	3,057	2,909	2,536
1901	3,178	2,688	2,637	2,610
1902	2,787	2,503	2,585	2,774
1903	2,946	2,705	2,723	2,615
1904	3,100	2,961	2,663	2,670
1905	3,187	2,810	2,786	2,581

The following table shows the number of deaths which have occurred in each of the twelve months in each of the years from 1892 to 1905:

DEATHS IN EACH MONTH FOR THE YEARS 1892-1905.

YEARS.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Not stated.	Totals.

Table No. 29 exhibits the total number of deaths which occurred in each month of the years 1898-1905. The number of deaths for 1905 in each month by counties is shown in Table No. 35.

Sex and Mortality.—Of the 11,381 decedents, 5,835 were males and 5,545 were females. The sex of one was unstated.

Among children dying before they were 5 years old, 1,263 were males and 965 were females; there were 298 more deaths among boys under 5 years of age than among girls within the same age-period. On the contrary, at the age-periods from 10 to 50 years there was a preponderance of deaths among females, while there were more deaths among males at the ages of from 50 to 80; and from 80 to 100, more among females. At the age of 100 years and over four women died. See Table No. 35.

Age and Mortality.—The following shows the number of deaths which occurred within each age-period, and the relation which the percentage in each period bears to the whole number of deaths:

Under 1 year of age	1,684	14.80 per cent.
From 1-5 years of age	544	4.78 per cent.
From 5-10 years of age	201	1.77 per cent.
From 10-20 years of age	439	3.86 per cent.
From 20-30 years of age	741	6.51 per cent.
From 30-40 years of age	655	5.76 per cent.
From 40-50 years of age	728	6.40 per cent.
From 50-60 years of age	1,061	9.31 per cent.
From 60-70 years of age	1,677	14.74 per cent.
From 70-80 years of age	2,073	18.21 per cent.
From 80-90 years of age	1,316	11.56 per cent.
From 90-100 years of age	218	1.92 per cent.
100 years of age and over,	4	0.03 per cent.
Ages not stated	40	0.35 per cent.

The Causes of Death.—The following table shows the mortality from ten prominent causes in the eight years 1898-1905. The various diseases of the brain have occupied the first place among the causes of death, and consumption was the next most prominent cause until 1898 when it was reduced to the third place in the list; in 1899 and 1900 it occupied the fourth place; in 1901, the third place; in 1902, 1903, and 1904 it again occu-

pied the fourth place, which it still keeps this year. Diseases of the heart have the second place, and pneumonia has the third place.

MORTALITY FROM TEN PROMINENT CAUSES—1898-1905.

CAUSES OF DEATH.	1905.	1905.	1904.	1903.	1902.	1901.	1900.	1899.	1898.
Brain disease*	1,364	1	1	1	1	1	1	1	1
Heart disease	1,222	2	2	2	2	2	3	3	2
Pneumonia	1,053	3	3	3	3	4	2	2	4

Bronchitis	218	9	9	9	9	9	9	9	10
Diphtheria and croup	110	10	10	10	10	10	10	10	9

*Including deaths certified as from apoplexy, paralysis, insanity, inflammatory diseases of brain, and its membranes, and other brain diseases.

†Including deaths certified as from nephritis, Bright's disease, albuminuria and uremia.

By referring to Table No. 30 it will be noticed that the causes of death are arranged by counties under fourteen classes. The following notes on some of the classes and individual causes of death will be arranged in accordance with the classification shown in this Table No. 30.

Infectious Diseases.—The lists of the infectious diseases usually include smallpox, measles, scarlet fever, typhoid fever, whooping cough, diphtheria and croup. The following table shows the number of deaths which resulted from these diseases in the several counties of the State:

SIX INFECTIOUS DISEASES BY COUNTIES—1905.

COUNTIES.	Estimated population for 1905.	Aggregate deaths from six infectious diseases—1905.	Infectious death-rate per 10,000—1905.
Androscoggin	56,879	25	4.40
Aroostook	66,322	31	4.67
Cumberland	105,559	50	4.74
Franklin	19,140	4	2.09
Hancock	37,241	10	2.69
Kennebec	60,170	27	4.49
Knox	30,406	14	4.60
Lincoln	19,669	3	1.52
Oxford	33,064	9	2.72
Penobscot	77,937	57	7.31
Piscataquis	17,357	4	2.30
Sagadahoc	20,769	12	5.78
Somerset	31,460	18	5.80
Waldo	24,185	7	2.89
Washington	45,607	16	3.51
York	65,913	56	8.50
State	714,678	343	4.80

In the foregoing table the second column shows for each county the whole number of deaths for 1905 from the infectious diseases; the third column shows the infectious death-rate for the same year. The following table makes a similar comparative exhibit for the cities:

SIX INFECTIOUS DISEASES BY CITIES—1905.

CITIES.	Estimated Population for 1905.	Aggregate deaths from six infectious diseases—1905.	Infectious death-rate per 10,000—1905.
Auburn	13,802	3	2.17
Augusta	12,261	9	7.34
Bangor	23,224	19	8 18
Bath	11,354	6	5.28
Belfast	4,615	2	4.33
Biddeford	16,996	23	1.35
Brewer	5,156	1	1.94
Calais	7,858	3	3.83
Eastport	5,513	-	-
Ellsworth	4,297	-	-
Gardiner	5,506	-	-
Hallowell	2,714	-	-
Lewiston	24,791	13	5.24
Old Town	5,989	9	15.03
Portland	57,005	28	4.91
Rockland	8,150	5	6.13
Saco	6,146	6	9.76
So. Portland	6,287	2	3.18
Waterville	10,662	8	7.50
Westbrook	7,609	5	6.57
Collectively	239,915	142	5.92

By consulting the following table it will be seen that the number of deaths from measles and grippe was larger than in 1904. There was a smaller number of deaths from typhoid fever, scarlet fever, whooping cough, diphtheria and croup, tetanus, and malarial disease.

INFECTIOUS DISEASES—1898-1905.

DISEASES.	1898.	1899.	1900.	1901.	1902.	1903.	1904.	1905.	Total.
Smallpox	–	3	2	–	12	7	3	–	27
Chickenpox	–	–	1	–	–	–	–	–	1
Measles	41	39	84	26	28	36	22	32	308
Rotheln (German measles)	–	–	1	–	–	–	–	–	1

Typhoid fever	216	195	196	224	162	225	242	156	1,616
Malarial disease	8	10	13	11	20	9	13	11	95

Smallpox.—In 1905, as in 1904, there were no deaths from smallpox. In 1903, smallpox was the cause of 7 deaths; in 1902, 12; in 1901, 0; in 1900, 2; in 1899, 3. No deaths were due to this disease from 1892, when our system of registration went into effect, until 1899.

Measles.—This disease caused the death of 32 persons, of whom 14 were males and 18 were females. The deaths from measles were 29 in 1892, 55 in 1893, 21 in 1894, 8 in 1895, 32 in 1896, 22 in 1897, 41 in 1898, 39 in 1899, 84 in 1900, 26 in 1901, 28 in 1902, 36 in 1903, and 22 in 1904.

MEASLES BY COUNTIES, MONTHS, AND AGE-PERIODS —1896-1905.

By Counties.		By months.		By age periods.	
Androscoggin	29	January	31	Under 1	98
Aroostook	56	February	33	1-5	128
Cumberland	48	March	36	5-10	28

Sagadahoc	6	December	18		
Somerset	32	Total	362		
Waldo	9				
Washington	17				
York	27				
State	362				

Scarlet Fever.—The total mortality from this disease was 7 (36 in 1892, 80 in 1893, 29 in 1894, 25 in 1895, 33 in 1896, 38 in 1897, 43 in 1898, 48 in 1899, 35 in 1900, 18 in 1901, 13 in 1902, 18 in 1903, and 10 in 1904), 1 male and 6 females. The largest number of deaths occurred at the age-period 1-5. The largest monthly number of deaths from this cause was 2 in March. There were 3 deaths in the first quarter, 2 in the second, 1 in the third, and 1 in the last quarter of the year.

Androscoggin county had 1 death from scarlet fever; Aroostook, 2; Cumberland, 1; and York, 3. Of the 7 deaths from this cause, 3 were in the cities.

The following is the exhibit of the scarlet fever deaths arranged by counties, months, and age-periods for the thirteen years 1893-1905:

SCARLET FEVER BY COUNTIES, MONTHS, AND AGE-PERIODS—1893-1905.

By Counties.		By months.		By age-periods.	
Androscoggin	28	January	24	Under 1	34
Aroostook	65	February	31	1-5	185
Cumberland	44	March	55	5-10	116
Franklin	7	April	34	10-20	45
Hancock	14	May	35	20-30	10
Kennebec	41	June	32	30-40	4
Knox	22	July	21	40-50	1
Lincoln	3	August	19	50-60	1
Oxford	5	September	27	Not stated	1
Penobscot	38	October	35	Total	397
Piscataquis	10	November	45		
Sagadahoc	10	December	39		
Somerset	12	Total	397		
Waldo	14				
Washington	19				
York	65				
State	397				

The scarlatina death-rate per 10,000 for this State was 0.09; for the cities, 0.12.

Grippe.—During the year for which this report is made, 243 deaths were attributed to grippe. By months the percentage distribution of deaths from this cause was as follows: January, 8.68; February, 19.84; March, 33.47; April, 19.84; May, 6.61; June, 2.89; July, 1.65; August, 0.41; September, 0.83; October, 1.65; November, 2.48; December, 1.65. The following shows the age incidence of deaths reported as having occurred from grippe:

Under 1 year,	16	40-50 years,	4
1-5 years,	9	50-60 years,	17
5-10 years,	1	60-70 years,	34
10-20 years,	3	70-80 years,	76
20-30 years,	4	Over 80 years,	72
30-40 years,	7		
		Total,	243

The grippe death-rate for the whole State was 3.40 for each 10,000 of living population (11.43 in 1892, 2.31 in 1893, 4.46 in 1894, 2.30 in 1895, 1.77 in 1896, 4.45 in 1897, 2.19 in 1898, 5.50 in 1899, 3.40 in 1900, 3.83 in 1901, 1.87 in 1902, 2.82 in 1903, and 2.39 in 1904).

DEATHS FROM GRIPPE BY COUNTIES AND MONTHS—1905.

Whooping Cough.—The number of deaths from whooping cough was 38 (54 in 1892, 51 in 1893, 20 in 1894, 82 in 1895, 111 in 1896, 46 in 1897, 44 in 1898, 96 in 1899, 99 in 1900, 28 in 1901, 51 in 1902, 110 in 1903, and 54 in 1904), of which 20 were males and 18 females. The number of deaths in the cities was 9. Twenty-four of the 38 deaths from this cause were among infants under 1 year of age.

The death-rate in the State from whooping cough was 0.53 per 10,000; that of the cities, 0.38.

The following shows the deaths from whooping cough arranged by counties, months, and age-periods:

WHOOPING COUGH BY COUNTIES, MONTHS, AND AGE-PERIODS—1905.

By Counties.		By months.		By age-periods.	
Androscoggin	2	January	4	Under 1	24
Aroostook	2	February	3	1-5	13

State	38				

Diphtheria.—There were for the year 1905, 110 deaths from diphtheria (106 in 1892, 69 in 1893, 77 in 1894, 135 in 1895, 109 in 1896, 200 in 1897, 185 in 1898, 92 in 1899, 155 in 1900, 127 in 1901, 115 in 1902, the same in 1903, and 162 in 1904). Of the decedents, 68 were males and 42 were females.

Ages: Under 1, 13; 1-5, 57; 5-10, 15; 10-20, 16; 20-30, 6; 30-40, 1; 40-50, 2.

Of the 110 deaths, 42 were in the cities, and 68 in other places. The diphtheria death-rate for the State was 1.54, and for the cities, 1.76.

The following exhibits the deaths from diphtheria arranged by counties and months, and gives the death-rate in each county:

DIPHTHERIA BY COUNTIES AND MONTHS—1905.

COUNTIES.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.	Death-rate per 10,000.

Waldo	28	Total	2,114		
Washington	74				
York	200				
State	2,114				

Typhoid Fever.—There were 156 deaths from typhoid fever. Of these, 94 were males and 62 were females. As indicative of the loss which the State incurs from typhoid fever, it is well to bear in mind that the age distribution of the decedents shows that the deaths from this disease are principally among those active and productive age-periods when human life is of the most value; 74 per cent. died between 10 and 50 years of age.

Ages: Under 1, 0; 1-5, 9; 5-10, 11; 10-20, 31, 20-30, 43; 30-40, 25; 40-50, 16; 50-60, 10; 60-70, 7; 70-80, 3; not stated, 1.

The largest number of deaths, 27, occurred in September, and the smallest number, 6, in July. By quarters, 35 were in the first quarter, 29 in the second, 45 in the third, and 47 in the last quarter of the year.

The typhoid death-rate of 3.29 in the cities is considerably greater than that in the villages and rural towns, which is 1.07. The rate for the State is 2.18.

The following exhibits the number of deaths from typhoid fever in each county, by months, with death-rate in each county:

TYPHOID FEVER—1905.

COUNTIES.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.	Death-rate per 10,000.

The following exhibits for the thirteen years 1893-1905 the distribution of deaths from typhoid fever by counties, months, and age-periods:

TYPHOID FEVER BY COUNTIES, MONTHS, AND AGE-PERIODS—1893-1905.

By Counties.		By months.		By age-periods.	
Androscoggin	260	January	217	Under 1	16
Aroostook	230	February	191	1-5	104
Cumberland	382	March	240	5-10	155
Franklin	63	April	214	10-20	637
Hancock	108	May	194	20-30	853
Kennebec	293	June	148	30-40	401
Knox	65	July	139	40-50	259
Lincoln	53	August	219	50-60	148
Oxford	123	September	332	60-70	99
Penobscot	460	October	373	70-80	67
Piscataquis	51	November	251	Over 80	15
Sagadahoc	50	December	253	Not stated	23
Somerset	89	Not stated	6	Total	2,777
Waldo	63	Total	2,777		
Washington	135				
York	352				
State	2,777				

Malarial Diseases.—Eleven deaths were registered as due to malarial diseases. In all these cases the disease was contracted outside of this State; six of these persons having contracted the disease in the war of the rebellion. All of the decedents were males; their respective ages were: 50-60, 1; 60-70, 7; 70-80, 3.

Tuberculosis.—In 1905, tuberculosis in its various forms was the cause of 1,109 deaths (1,513 in 1892, 1,446 in 1893, 1,449 in 1894, 1,397 in 1895, 1,359 in 1896, 1,338 in 1897, 1,239 in 1898, 1,241 in 1899, 1,215 in 1900, 1,250 in 1901, 1,165 in 1902. 1,076 in 1903, and 1,217 in 1904). The death-rate per 10,000 from this cause was 15.30.

Cerebral Tuberculosis.—(Tubercular Meningitis.)—The number of deaths was 71; 39 were of males and 32 of females.

The number for the cities was 34. The death-rate for the State was 0.99; for the cities, 1.42.

Ages: Under 1, 14; 1-5, 33; 5-10, 13; 10-20, 6; 20-30, 1; 30-40, 2; 40-50 0; over 60, 2.

Pulmonary Tuberculosis. (Consumption.)—From this cause 894 deaths were registered in 1905, which is equivalent to a death-rate of 12.50 per 10,000 of population. The death-rate for the cities was 15.09. The following is a tabular arrangement of the number of deaths in the State from pulmonary tuberculosis in each of the fourteen registration years, together with the death-rate from consumption for each year:

	Number of deaths.	Death rate per 10,000.
1892	1,352	20.24
1893	1,299	19.35
1894	1,262	18.80
1895	1,195	17.71
1896	1,172	17.21
1897	1,128	16.47
1898	1,021	14.85
1899	1,015	14.69
1900	1,027	14.79
1901	1,033	14.87
1902	970	13.97
1903	901	12.97
1904	1,016	14.63
1905	894	12.50

There were in 1905, 458 fewer deaths than in 1892, 405 fewer than in 1893, 368 fewer than in 1894, 301 fewer than in 1895, 278 fewer than in 1896, 234 fewer than in 1897, 127 fewer than in 1898, 121 fewer than in 1899, 133 fewer than in 1900, 139 fewer than in 1901, 76 fewer than in 1902, 7 fewer than in 1903, and 122 fewer than in 1904.

Ages: Under 1, 15; 1-5, 13; 5-10, 11; 10-20, 108; 20-30, 252; 30-40, 166; 40-50, 109; 50-60, 91; 60-70, 63; 70-80, 52; 80 and over, 10; not stated, 4.

It is thus shown in this report, as it was in the thirteen preceding reports, that the smallest number of deaths occurred at the age-period 5-10 years, and that, of the decedents whose ages were given, 81 per cent. died at those ages when their deaths entailed the greatest loss to the State.

As to the sex, 410 of the decedents, or 46.0 per cent., were males; and 484, or 54.0 per cent., were females.

The following table shows the number of deaths in each county by months, with the death-rate from consumption in each county:

CONSUMPTION BY COUNTIES AND MONTHS—1905.

COUNTIES.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Not stated.	Total.	Death-rate per 10,000.

Tuberculosis Mesenteric.—There were 59 deaths from this cause, 21 males and 38 females.

Ages: Under 1, 0; 1-5, 3; 5-10, 6; 10-20, 6; 20-40, 20; 40-60, 13; over 60, 11.

Tuberculosis, Other Forms.—Of these deaths, 85 in all, the cause assigned was: tuberculosis or general tuberculosis, 44; tuberculosis of larynx, 16; tuberculosis of stomach, 3; tuberculosis of kidneys, 1; tuberculosis of joints, 1; Pott's disease, 8; and others, 12.

There were 27 deaths from erysipelas; 50 from pyemia and septicemia, and 32 from puerperal fever—giving a special death-rate of 1.53. The following shows the distribution of puerperal fever by months and counties:

January	6
February	0
March	1

Twenty deaths were returned under alcoholism. The special death-rate from alcoholism was 0.28.

Rheumatism.—The returns give 60 deaths from this cause (68 in 1892, 46 in 1893, 66 in 1894, 56 in 1895, 44 in 1896, 42 in 1897, 57 in 1898, 56 in 1899, 56 in 1900, 53 in 1901, 45 in 1902, 58 in 1903, and 60 in 1904), 32 males and 28 females. Sixteen of these deaths were in the cities. The special death-rate for this disease was, therefore, 0.84, while that in the cities was 0.67. The following shows the deaths from this cause arranged by counties, months, and age-groups:

RHEUMATISM BY COUNTIES, MONTHS, AND AGE-PERIODS—1905.

Cancer.—From cancer in its various forms and locations there were 662 deaths (404 in 1892, 433 in 1893, 474 in 1894, 480 in 1895, 518 in 1896, 463 in 1897, 531 in 1898, 541 in 1899, 526 in 1900, 570 in 1901, 615 in 1902, 598 in 1903, and 611 in 1904). Of the decedents, 238 were males and 424 were females. The cancer death-rate for the State was, therefore, 9.26.

Distributed as to its more frequent locations, there died of cancer of the stomach, 180; female genital organs, 100; liver, 85; intestines, 76; breast, 51; mouth, 25; skin, 24; kidneys, 11; abdomen, 9; throat, 9; pancreas, 8; pelvis, 7; bladder, 6; neck, 3; lung, 3; spleen, 3; thigh, 2; leg, 2; various, 27; unspecified, 31.

The deaths from cancer, arranged by sex and age-periods of the decedents, is exhibited in the following:

CANCER BY SEX AND AGE-PERIODS—1905.

Sex.	Under 1.	1-5.	5-10.	10-20.	20-30.	30-40.	40-50.	50-60.	60-70.	70-80.	Over 80.	Not stated.	Total.

Washington	42	9.21	388	6.54			
York	61	9.25	731	8.53			
State	662	9.26	7,022	7.56			

Diabetes.—The deaths from this cause numbered 115 (55 in 1892, 65 in 1893, 71 in 1894, 77 in 1895, 67 in 1896, 95 in 1897, 88 in 1898, 95 in 1899, 74 in 1900, 87 in 1901, 83 in 1902, 92 in 1903, and 91 in 1904. The special death-rate from diabetes was, therefore, 1.61 in 1905. Fifty-one of the decedents were males and 64 were females.

Ages: 1-5, 2; 5-10, 3; 10-20, 6; 20-30, 5; 30-40, 7; 40-50, 9; 50-60, 28; 60-70, 39; 70-80, 14; 80-90, 2.

Old Age.—There were registered 724 deaths as due to old age, 320 men and 404 women. Of these decedents, 26 were from 60 to 70 years of age; 179 were from 70 to 80; 400 were from 80 to 90; 116 were from 90 to 100; while 4 were 100 years of age and older.

From Table No. 35, however, it will be seen that the whole number of persons who died at the ages between 70 and 100 years or more was 3,611 (3,801 in 1892, 3,147 in 1893, 3,242 in 1894, 2,897 in 1895, 3,045 in 1896, 3,232 in 1897, 3,109 in 1898, 3,378 in 1899, 3,355 in 1900, 3,332 in 1901, 3,289 in 1902, 3,404 in 1903, and 3,532 in 1904), or one death in every three and one-seventh was of a person who was between 70 and 100 years of age or older. Assuming that all these 3,611 died of old age, the death-rate from old age would be 50.53 among every 10,000 living at all ages.

The following shows the number of deaths in each county of persons 70 years of age and over, and the number of their deaths in each 10,000 of the population at all ages:

OLD AGE—1905.

COUNTIES.	Deaths.	Rate per 10,000.	COUNTIES.	Deaths.	Rate per 10,000.
Androscoggin	207	36.39	Oxford	176	53.23

Cumberland	560	53.05	Piscataquis	94	54.16
Franklin	105	54.86	Sagadahoc	113	54.41
Hancock	204	54.77	Somerset	200	58.04
Kennebec	358	59.50	Waldo	169	69.88
Knox	173	56.90	Washington	229	50.21
Lincoln	117	59.48	York	370	56.13

Centenarians.—Among the persons whose decease occurred in 1905, three had exceeded the age of 100 years, while one was just 100. All were females. Their names, together with a few facts relating to the life history of each, are as follows:

August 12, Mary M. Cunningham died at Bangor at the age of 105 years, 1 month, and 8 days. She was born in Sedgwick. Her father, Daniel Bridges, and her mother, whose maiden name was Mary Withington, were also born in Sedgwick.

November 23, Diana Beckwith died at Pittston at the age of 102 years, and 9 months. She and also her parents were born in Canada. Her father's name was Robert Wilcox. Her mother's name is not given.

March 7, Elizabeth Tower died at Washburn at the age of 102 years, and 1 month. She and her father, whose name was James Easler, were born in New Brunswick. The name and birthplace of her mother were unknown.

March 22, Amanda Walker died at Palermo at the age of 100 years. She was born in Waldoboro. No facts are known concerning her parents.

Diseases of the Nervous System and of Organs of Special Sense.—The number of deaths registered under the causes included in this group was 1,648 (1,459 in 1892, 1,451 in 1893, 1,543 in 1894, 1,585 in 1895, 1,520 in 1896, 1,661 in 1897, 1,607 in 1898, 1,728 in 1899, 1,652 in 1900, 1,615 in 1901, 1600 in 1902, 1,641 in 1903, and 1,578 in 1904), or 23.06 to every 10,000 of population.

Inflammation of the Brain or Membranes.—The number of deaths was 216 (236 in 1892, 263 in 1893, 286 in 1894, 261 in 1895, 242 in 1896, 327 in 1897, 272 in 1898, 273 in 1899, 251 in 1900, 264 in 1901, 211 in 1902, 243 in 1903, and 212 in 1904), 119 males and 97 females. Of these, 107 were in the cities. The death-rate from the several diseases grouped under this head was 4.46.

Ages: Under 1, 88; 1-5, 48; 5-10, 4; 10-20, 26; 20-40, 19; 40-60, 20; over 60, 11.

Apoplexy.—From this cause 751 deaths occurred (488 in 1892, 422 in 1893, 408 in 1894, 488 in 1895, 492 in 1896, 555 in 1897, 558 in 1898, 629 in 1899, 583 in 1900, 595 in 1901, 674 in 1902, 712 in 1903, and 714 in 1904), 364 males and 387 females. Of these, 238 were in the cities. The State's death-

rate from apoplexy was, therefore, 10.51; that of the cities, 9.92.

The largest number of deaths from apoplexy, 204, occurred in the spring; the largest number in any one month was 75 in November.

In 1894, 1896, and 1900, the greatest mortality from this cause occurred in the spring; in 1892, 1893, 1895, 1897, 1899, 1901, 1903, and 1904, in the winter; in 1898, in the winter and spring; and in 1902, in the summer.

Conversely, the smallest number of deaths, 47, was in September; the smallest number in any one season was 170 in the summer months. Over 80 per cent. of the deaths were of persons 60 years of age and upward.

APOPLEXY BY COUNTIES AND MONTHS—1905.

State	751	10.51	7,581	8.16

Softening of the Brain.—From cerebral softening there were 29 deaths—those of 18 males and 11 females.

Ages: From 40-50, 2; 50-60, 4; 60-70, 7; 70-80, 11; over 80, 5.

Paralysis.—Of the 235 deaths from paralysis, 106 persons were males and 129 were females.

Ages: Under 1, 0; 1-5, 3; 5-10, 0; 10-20, 2; 20-30, 0; 30-40, 5; 40-50, 14; 50-60, 30; 60-70, 64; 70-80, 71; 80-90, 42; over 90, 4.

Epilepsy.—Twenty-three males and 14 females died of epilepsy, 37 in all.

Ages: Under 1, 2; 1-5, 2; 10-20, 5; 20-40, 10; 40-60, 5; over 60, 12; not stated, 1.

Tetanus.—This disease was the cause of 7 deaths (7 in 1892, 10 in 1893, 6 in 1894, 10 in 1895, 8 in 1896, 2 in 1897, 4 in 1898, 11 in 1899, 7 in 1900, 5 in 1901, 7 in 1902, 11 in 1903, and 14 in 1904). The decedents were 6 males and 1 female. Of these 7 deaths from tetanus, 1 occurred in each of the months January, June, August, and September; and 3 in July, all from the 3rd to the 9th.

Ages: 1-5, 1; 5-10, 2; 10-20, 2; 40-50, 1; over 70, 1.

Diseases of the Heart.—From diseases of the heart, including those from endocarditis, pericarditis, angina pectoris, and organic diseases of the heart, there were 1,222 deaths (816 in 1892, 875 in 1893, 940 in 1894, 948 in 1895, 1,036 in 1896, 1,062 in 1897, 1,132 in 1898, 1,028 in 1899, 1,045 in 1900, 1,076 in 1901, 1,097 in 1902, 1,153 in 1903, and 1,191 in 1904). The following exhibits the age and sex distribution of each form of disease for the year 1905:

Diseases.	Under 1	1-10.	10-20.	20-40.	40-60.	Over 60.	Unknown.	Males.	Females.	Totals.
Pericarditis	–	–	–	2	2	5	–	4	5	9
Endocarditis	2	1	4	3	17	30	–	32	25	57
Organic diseases of heart	16	7	17	69	228	728	3	601	467	1,068
Angina pectoris	–	1	–	4	24	59	–	45	43	88
Total	18	9	21	78	271	822	3	682	540	1,222

For the year 1905, the number of deaths in each county from diseases of the heart is shown in the following, as well as the special death-rates for State and county:

COUNTIES.	Number of deaths.	Rate.	COUNTIES.	Number of deaths.	Rate.
Androscoggin	80	14.06	Oxford	61	18.45
Aroostook	48	7.24	Penobscot	118	15.14
Cumberland	226	21.41	Piscataquis	21	12.10
Franklin	27	14.11	Sagadahoc	44	21.19
Hancock	62	16.65	Somerset	58	16.83
Kennebec	118	19.61	Waldo	56	23.15
Knox	64	21.05	Washington	85	18.64
Lincoln	35	17.79	York	119	18.05
			State	1,222	17.10

As may be noted, Waldo county had the highest death-rate from diseases of the heart, and Aroostook the lowest. The rate for the State was 17.10.

The whole number of deaths from diseases of the heart arranged by sex and age-groups was as follows:

HEART DISEASE BY SEX AND AGE-PERIODS—1905.

SEX.	Under 1.	1-5.	5-10.	10-20.	20-30.	30-40.	40-50.	50-60.	60-70.	70-80.	Over 80.	Not stated.	Total.
Males	14	2	5	7	16	23	42	98	209	191	82	2	682
Females	4	1	5	10	20	19	49	82	114	167	68	1	540
Total	18	3	10	17	36	42	91	180	314	358	150	3	1,222

Diseases of the Respiratory System.—Without the inclusion of tuberculosis, 1,391 persons died from the various respiratory diseases, as tabulated on page 95 (1,769 in 1892, 1,407 in 1893, 1,312 in 1894, 1,165 in 1895, 1,141 in 1896, 1,347 in 1897, 1,124 in 1898, 1,455 in 1899, 1,513 in 1900, 1,405 in 1901, 1,380 in 1902, 1,348 in 1903, and 1,428 in 1904). From these diseases there were, therefore, 378 fewer deaths than in 1892, 16 fewer than in 1893, 79 more than in 1894, 226 more than in 1895, 250 more than in 1896, 44 more than in 1897, 267 more than in 1898, 64 fewer than in 1899, 122 fewer than in 1900,

14 fewer than in 1901, 11 more than in 1902, 43 more than in 1903, and 37 fewer than in 1904.

Including the deaths from pulmonary tuberculosis, as well as from pneumonia, bronchitis, and the other respiratory diseases, in 1905 the number of deaths was 863 smaller than in 1892, 421 smaller than in 1893, 289 smaller than in 1894, 75 smaller than in 1895, 28 smaller than in 1896, 190 smaller than in 1897, 140 larger than in 1898, 175 smaller than in 1899, 255 smaller than in 1900, 153 smaller than in 1901, 65 smaller than in 1902, 36 larger than in 1903, and 159 smaller than in 1904.

The death-rate from the respiratory diseases (excluding pulmonary tuberculosis) in 1905 was 19.46 in each 10,000 of population, as compared with 20.56 in 1904, 19.41 in 1903, 19.87 in 1902, 20.23 in 1901, 21.79 in 1900, 20.91 in 1899, 17.00 in 1898, 20.38 in 1897, 17.26 in 1896, 17.62 in 1895, 19.85 in 1894, 21.28 in 1893, 27.16 in 1892.

Pneumonia.—The number of deaths registered under this cause was 1,053 (1,431 in 1892, 1,143 in 1893, 1,023 in 1894, 812 in 1895, 781 in 1896, 936 in 1897, 769 in 1898, 1,067 in 1899, 1,067 in 1900, 994 in 1901, 987 in 1902, 999 in 1903, and 1,050 in 1904), of which 507 were males and 546 were females. The death-rate from this disease was, therefore, 14.73 per 10,000 (21.56 in 1892, 17.27 in 1893, 15.47 in 1894, 12.28 in 1895, 11.81 in 1896, 14.16 in 1897, 11.62 in 1898, 15.44 in 1899, 15.36 in 1900, 14.31 in 1901, 14.21 in 1902, 14.39 in 1903, and 15.12 in 1904). As 386 of the deaths occurred in the cities, the urban death-rate was 14.05.

The age distribution of pneumonia by sex and age-groups is shown in the following table:

PNEUMONIA BY SEX AND AGE-PERIODS—1905.

Sex.	Under 1.	1-5.	5-10.	10-20.	20-30.	30-40.	40-50.	50-60.	60-70.	70-80.	Over 80.	Not stated.	Total.

Somerset	644	Not stated	11	Total	12,681
Waldo	448	Total	12,681		
Washington	769				
York	1,382				
State	12,681				

Bronchitis.—From this cause, including both acute and chronic bronchitis, 218 deaths were registered (287 in 1892, 197 in 1893, 209 in 1894, 225 in 1895, 220 in 1896, 237 in 1897, 210 in 1898, 233 in 1899, 262 in 1900, 222 in 1901, 241 in 1902, 209 in 1903, and 223 in 1904). Among these decedents, 105 were males and 113 were females. Of these 218 deaths, 67 were in the cities. The largest number of deaths in any one month was 42 in March. In August occurred the smallest number of deaths, 4. The largest number of deaths in three consecutive months was 101 in January, February, and March; the smallest number in any three consecutive months was 24 in July, August, and September. The number of deaths by quarters was 101, 51, 24, and 41, and 1 not stated.

The bronchitis death-rate of the State was 3.05; of the cities, 2.79.

The following shows the age distribution of the decedents from this disease; it will be noticed that there was a great fatality at either extreme of life.

Under 1 year,	57	40-50 years,	3
1-5 years,	18	50-60 years,	15
5-10 years,	2	60-70 years,	18
10-20 years,	2	70-80 years,	55
20-30 years,	3	Over 80 years,	40
30-40 years,	5		

The following shows the distribution of bronchitis by counties and months, together with the bronchitis death-rate of counties and State:

BRONCHITIS—1905.

Counties.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Not stated.	Total.	Death-rate per 10,000.

State	32	27	42	24	15	12	8	4	12	11	11	19	1	218	3.05

Pleurisy.—Twenty-one deaths were charged to this disease (18 in 1892, 19 in 1893, 15 in 1894, 19 in 1895, 19 in 1896, 26 in 1897, 17 in 1898, 24 in 1899, 28 in 1900, 24 in 1901, 16 in 1902, 17 in 1903, and 24 in 1904),—12 males and 9 females.

Ages: Under 1, 1; 10-20, 1; 20-30, 1; 30-40, 5; 40-50, 2; 50-60, 4; 60-70, 1; over 70, 6.

Diseases of the Digestive System.—The combined mortality from this group of diseases was 1,303 (659 in 1892, 653 in 1893, 685 in 1894, 693 in 1895, 679 in 1896, 673 in 1897, 651 in 1898, 1,411 in 1899, 1,411 in 1900, 1,202 in 1901, 973 in 1902, 1,087 in 1903, and 1,076 in 1904), or a death-rate of 18.23. The distribution of these under their several causes will be found on page 96.

Diarrheal Diseases.—The total number of deaths caused by the diseases under this group was 719 (662 in 1892, 642 in 1893, 602 in 1894, 635 in 1895, 639 in 1896, 666 in 1897, 854 in 1898, 662 in 1899, 805 in 1900, 684 in 1901, 476 in 1902, 566 in 1903, and 514 in 1904). The death-rate from this group of diseases was 10.06 per 10,000.

Infantile Diarrhea.—This, as synonymous with cholera infantum or including it, was the cause of 561 deaths (546 in 1892, 507 in 1893, 468 in 1894, 523 in 1895, 520 in 1896, 528 in 1897, 669 in 1898, 565 in 1899, 680 in 1900, 567 in 1901, 360 in 1902, 403 in 1903, and 369 in 1904). A reference to the following table will show the number of deaths which occurred in each month, as well as the number in each county, and the county death-rates, for this cause. There were in the first quarter of the year but 35 deaths from this cause; in the second quarter, 28; in the third quarter, 391; and in the fourth quarter, 107. The largest number of deaths occurred in August, 168.

Of the children dying from this cause, 58 per cent. were less than 6 months old, and another 29 per cent. were less than 1 year of age, making 87 per cent. of deaths within the first year of age.

Ages: Under 3 months, 151; 3-6 months, 225; 6-9 months, 80; 9-12 months, 41; 12-18, months, 56; 18 months—2 years, 8.

In the classification of deaths from diarrheal diseases, only the deaths among children under 2 years of age are included under "infantile diarrhea." The deaths from diarrheal diseases, other than those under this cause, were: cholera morbus, 12; dysentery, 35; and diarrhea, 111.

Of the 561 deaths from infantile diarrhea, 239 were returned from the cities. This represents an urban death-rate from this cause of 9.96 (15.20 in 1892, 14.33 in 1893, 13.27 in 1894, 13.78 in 1895, 11.43 in 1896, 14.95 in 1897, 15.15 in 1898, 11.77 in 1899, 14.84 in 1900, 10.09 in 1901, 6.89 in 1902, 6.49 in 1903, and 6.26 in 1904), which is in contrast with 4.51, the rate for

the villages and rural districts (5.33 in 1892, 4.95 in 1893, 4.47 in 1894, 5.44 in 1895, 6.36 in 1896, 5.05 in 1897, 8.00 in 1898, 6.47 in 1899, 7.37 in 1900, 7.24 in 1901, 4.37 in 1902, 5.50 in 1903, and 4.86 in 1904).

Sagadahoc	-	December	3	Total	90
Somerset	7	Total	90		
Waldo	3				
Washington	8				
York	4				
State	90				

Appendicitis.—Of the deaths classified under this cause, 68 in number, 32 were males and 36 were females. The number of deaths in each month was: January, 5; February, 3; March, 9; April, 6; May, 9; June, 4; July, 4; August, 8; September, 6; October, 6; November, 6; December, 2.

Ages: Under 1, 1; 1-5, 4; 5-10, 5; 10-20, 19; 20-30, 16; 30-40, 7; 40-50, 6; 50-60, 5; 60-70, 3; over 70, 2.

Cirrhosis of the Liver.—Forty-four deaths were ascribed to cirrhosis of the liver—those of 26 men and 18 women. Of these 44 deaths, 8 were in the cities, and 36 in the rural parts of the State. The death-rate in the State from this one cause was 0.62 per 10,000 (0.19 in 1892, 0.18 in 1893, 0.29 in 1894, 0.50 in 1895, 0.33 in 1896, 0.45 in 1897, 0.58 in 1898, 0.52 in 1899; 0.79 in 1900; 0.63 in 1901; 0.63 in 1902; 0.92 in 1903, and 0.66 in 1904).

Diseases of the Genito-Urinary System and its Adnexa.—There were 773 deaths referred to the diseases under this group, equivalent to a death-rate of 10.82.

Nephritis.—Acute nephritis caused the death of 47 persons, 23 males and 24 females. The death-rate from nephritis was, therefore, 0.66.

Ages: Under 1, 1; 1-5, 3; 5-10, 2; 10-20. 5; 20-30, 10; 30-40, 7; 40-50, 5; 50-60, 4; 60-70, 6; 70-80, 3, not stated, 1.

**Bright's Disease.*—This was the cause of 599 deaths (204 in 1892, 217 in 1893, 219 in 1894, 234 in 1895, 282 in 1896, 231 in 1897, 250 in 1898, 262 in 1899, 443 in 1900, 471 in 1901, 523 in 1902, 573 in 1903, and 575 in 1904), 335 males and 264 females. Of these deaths, 217 were in the cities.

The sex and age-group distribution of Bright's disease is as follows:

BRIGHT'S DISEASE BY SEX AND AGE-PERIODS—1905.

Sex.	Under 1.	1-5.	5-10.	10-20.	20-30.	30-40.	40-50.	50-60.	60-70.	70-80.	Over 80.	Not stated.	Total.
Males	1	–	1	5	12	12	20	62	97	91	33	1	335
Females	2	–	2	2	18	17	28	46	74	63	10	2	264
Total	3	–	3	7	30	29	48	108	171	154	43	3	599

* This title includes: Chronic, albuminous, interstitial, or parenchymatous nephritis; albuminuria; amyloid or fatty degeneration of the kidney; amyloid kidney; steatosis of the kidney; renal sclerosis. Also includes when their precise nature is not indicated: Uremia, uremic eclampsia; uremic delirum; uremic coma.

The following tabulation shows the number of deaths from Bright's disease in each county, and the death-rate of each from this cause:

Counties.	Number of deaths.	Rate.	Counties.	Number of deaths.	Rate.
Androscoggin	39	6.86	Oxford	24	7.26
Aroostook	29	4.37	Penobscot	58	7.44
Cumberland	125	11.84	Piscataquis	10	5.76
Franklin	20	10.45	Sagadahoc	24	11.56
Hancock	28	7.52	Somerset	27	7.84
Kennebec	50	8.31	Waldo	23	9.51
Knox	18	5.92	Washington	30	6.58
Lincoln	20	10.17	York	74	11.23
			State	599	8.38

The Puerperal State.—Under this class of accidents and diseases of reproduction, 51 deaths were registered, not including puerperal fever, (69 in 1892, 50 in 1893, 41 in 1894, 36 in 1895, 56 in 1896, 62 in 1897, 51 in 1898, 40 in 1899, 50 in 1900, 52 in 1901, 69 in 1902, 94 in 1903, and 72 in 1904). This is equivalent to a special death-rate of 0.71.

Deaths from External Causes.—Under this class there were 518 deaths.

Fractures caused 68 deaths—fracture of skull, 31; of thigh, 14; of hip, 11; of spine, 5; of ribs, 3; of neck, 2; of leg, 1; not stated, 1.

Burns and scalds caused 39 deaths—14 were from clothing taking fire; 7, explosion of lamp; 5, scalded with hot water; 2, lighting fire with kerosene; 1, playing with matches; 1, explosion of oil stove; 1, by overturning of oil stove; 1, by overturning lamp; the rest, unspecified.

Sunstroke caused 1 death. Four persons died from exposure to cold.

From accidental drowning, 87 deaths occurred.

Other accidental injuries caused the death of 142 persons; 33 were from railway injuries; 28, from falls; 25, from pistol and gunshot wounds; 11, working in a mill; 6, from falling

timber; 4, by electric cars; 4, from explosions; 3, run over by teams; 2, crushed by buildings; 2, by runaway horses; 1, crushed by cart; 1, tramped on by cow; 1, tramped on by horse; 1, crushed by logs; 1, by swallowing piece of glass; 1, working in shoe shop; and the rest were unspecified.

From acute poisoning there were 24 deaths.

Fifty people met their death from other external violence, including 14 murders.

The death-rate in the State under this class was 7.25.

Suicide.—Within the year 84 persons took their own lives (59 in 1892, the same number in 1893, 39 in 1894, 66 in 1895, 81 in 1896, 71 in 1897, 56 in 1898, 93 in 1899, 66 in 1900, 81 in 1901, 73 in 1902, 77 in 1903, and 107 in 1904), 67 males and 17 females. Of the males, the occupation of 18 was farmer; of 8, laborer; of 6, carpenter; of 3, bookkeeper; of 2 each, merchant and soldier; of 1 each, barber, blacksmith, brakeman, clerk, dentist, doctor, engineer, expressman, foreman, lawyer, machinist, master mariner, packer, painter, potato buyer, railroad employee, sailor, shoe factory employee, spool maker, stone cutter, teamster, telegraph operator; while of 6 no occupation was given.

Of the females, the occupation of 7 was registered as housewife; 3, as housekeeper; 1, as teacher; 1, as domestic; and not stated, 5.

As to the means employed, 25 committed suicide by shooting; 23, by hanging; 11, by poisoning; 13, by drowning; 9, by cutting throat; 1, asphyxiation by illuminating gas; and not stated, 2.

SUICIDES BY AGES, MONTHS, AND COUNTIES—1905.

AGE-PERIODS.		Months.		Counties.		Rate per 10,000 of population.
10-20	1	January	3	Androscoggin	6	1.05
20-30	14	February	4	Aroostook	3	0.45
